About these release notes

These release notes describe the features of CLI Tools, and provide information about the prerequisites for using the tool and software components that CLI Tools supports. The release notes also include a list of commands that you can use in CLI Tools.

What's new in this release

Version 1.4 is the first release of CLI Tools.

CLI Tools overview

CLI Tools is a command-line interface from which you can control a SolidFire storage system without having to use the SolidFire API. CLI Tools provides an easy interface that enables storage administrators to query for information, make changes to objects in a storage system, and perform common storage system tasks. Users who are familiar with using shell or command-line based configuration interfaces can take advantage of CLI Tools.

CLI Tools includes the following features:

- Coverage of 87 percent of SolidFire API methods
- Inline help system for commands
- Capability on Windows, macOS, and Linux operating systems to automatically populate command syntax
- Ability to provide responses to commands in three output formats: tree, JSON, and pickle

Support matrix

The tool supports the following software and operating systems:

Component	Version
SolidFire Element OS	9.0 and later
Python	<ul style="list-style-type: none"> • Python 2: 2.7 and later • Python 3: 3.3 or later
Operating system	<ul style="list-style-type: none"> • Windows 7, 8, and 10 • macOS • Linux

List of commands

This section lists all the commands that you can run in CLI Tools.

account add
account modify
account getbyid
account remove
account list
account getefficiency
account getbyname
backuptarget list

Where to find additional information

You can use the resources in this section for additional information.

- For information about how to use CLI Tools, see the *NetApp SolidFire CLI Tools User Guide*.
- For more information about deploying, configuring, and using your cluster, see the *NetApp SolidFire Element OS User Guide*.
- For information about the NetApp SolidFire API, see the *NetApp SolidFire Element OS API Reference Guide*.

Contacting NetApp SolidFire Active Support

You can contact NetApp SolidFire Active Support if you have any questions or comments about SolidFire documents or products in general.

Visit [NetApp SolidFire support](#) or email ng-SF-Support@netapp.com for help with NetApp SolidFire systems.

How to send comments about documentation and receive update notifications

You can help us to improve the quality of our documentation by sending us your feedback. You can receive automatic notification when production-level (GA/FCS) documentation is initially released or important changes are made to existing production-level documents.

If you have suggestions for improving this document, send us your comments by email.

[*doccomments@netapp.com*](mailto:doccomments@netapp.com)

To help us direct your comments to the correct division, include in the subject line the product name, version, and operating system.

If you want to be notified automatically when production-level documentation is released or important changes are made to existing production-level documents, follow Twitter account @NetAppDoc.

You can also contact us in the following ways:

- NetApp, Inc., 495 East Java Drive, Sunnyvale, CA 94089 U.S.
- Telephone: +1 (408) 822-6000
- Fax: +1 (408) 822-4501
- Support telephone: +1 (888) 463-8277
